Problem Statement #14: Corporate Mental Wellness & Counseling Platform

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall generate an anonymized pseudo-ID for employee accounts so employees can book counseling sessions without revealing their corporate email or employee ID to the therapist.	High	Pass: Therapist dashboard displays only the pseudo-ID and no corporate email or employee ID. Fail: Any employee PII is visible in booking information.	Protects employee identity and ensures confidential counseling.
FR-002	Functional	The system shall allow employees to assess their stress level and record their personal wellness indicators.	High	Pass: Employee can complete a stress assessment and the system records the resulting wellness indicators. Fail: Assessment cannot be completed or results are not stored.	Enables employees to monitor their personal mental wellness.
FR-003	Functional	The system shall allow employees to view available therapists and book a confidential counseling session using available appointment slots.	High	Pass: Employee can select an available therapist and time slot and receives a booking confirmation. Fail: The system confirms an appointment for an unavailable slot.	Provides the core counseling-booking functionality.
FR-004	Functional	The system shall allow licensed therapists to view scheduled counseling appointments using only the employee's anonymized pseudo-ID.	High	Pass: Therapist can view scheduled appointments and each employee is identified only by pseudo-ID. Fail: Corporate email or employee ID is displayed.	Allows therapists to manage appointments while maintaining employee anonymity.
FR-005	Functional	The system shall allow employees to track and view their personal wellness indicators and counseling-related progress over time.	Medium	Pass: Employee can view previously recorded wellness indicators and progress history. Fail: Previous wellness records cannot be retrieved or displayed.	Helps employees monitor changes in personal wellness.
NFR-001	Nonfunctional Performance & Security	The appointment scheduler shall handle timezone conversions accurately across global office locations.	High	Pass: Appointment times are displayed correctly according to the employee's and therapist's configured time zones during testing. Fail: Displayed time differs from the correct converted time.	Prevents scheduling errors across different time zones.
NFR-002	Nonfunctional Security & Privacy	The system shall protect employee counseling and wellness information from unauthorized access and ensure therapists cannot access corporate employee identifiers.	High	Pass: Security testing confirms unauthorized users cannot access protected data and therapists cannot retrieve corporate email or employee ID. Fail: Protected information or identifiers can be accessed without authorization.	Protects confidential mental-wellness information and employee identity.
