

Use-Case Flow Specification

Use Case: UC-02 — Book Counseling Session

Primary Actor: Corporate Employee

Supporting Actor: Licensed Therapist

System: Corporate Mental Wellness & Counseling Platform

1. Preconditions

1. The Corporate Employee has access to the Corporate Mental Wellness & Counseling Platform.
2. The employee is authenticated in the system.
3. The employee has access to the counseling booking functionality.
4. At least one counseling appointment slot is available.

2. Postconditions

1. A counseling appointment is successfully created and stored in the system.
2. The employee is identified to the therapist using an anonymized pseudo-ID.
3. The selected therapist and appointment time are associated with the booking.
4. The employee receives an appointment confirmation.

3. Main Success Scenario

1. The Corporate Employee logs into the Corporate Mental Wellness & Counseling Platform.
2. The system authenticates the employee and displays the available services.
3. The employee selects **Book Counseling Session**.
4. The system generates or retrieves an anonymized pseudo-ID for the employee.
5. The system displays available therapists and counseling appointment slots.
6. The employee selects a suitable therapist and available appointment slot.
7. The system validates the selected therapist and appointment slot.
8. The system creates the confidential counseling appointment using the employee's anonymized pseudo-ID.
9. The system records the appointment details.
10. The system sends an appointment confirmation to the employee.
11. The system displays the booking confirmation to the employee.
12. The use case ends successfully.

4. Alternate Flow — Selected Appointment Slot Unavailable

At Step 7:

1. The system detects that the selected appointment slot is no longer available.
2. The system displays a message informing the employee that the selected slot is unavailable.
3. The system displays alternative available appointment slots.
4. The employee selects another available slot.
5. The system validates the newly selected slot.
6. The system creates the confidential counseling appointment.
7. The system displays the booking confirmation.
8. The use case ends successfully.

5. Exception / Failure Condition

If no alternative appointment slots are available, the system informs the employee that no suitable appointments are currently available and allows the employee to exit the booking process or try again later.
